Charlotte, NC | 704-605-1822 | 1derek.perkins1@gmail.com | linkedin.com/in/derek-perkins | github.com/dryhour

EDUCATION

University of North Carolina at Chapel Hill <i>B.S. in Computer Science & B.S. in Data Science (Double Major), Minor in Mathematics</i>	Expected May 2030 <i>Chapel Hill, NC</i>
Phillip O. Berry Academy of Technology <i>High School Diploma GPA: 4.43</i>	Graduated 2026 <i>Charlotte, NC</i>

EXPERIENCE

Data Analyst Intern <i>Local Crafts</i>	Jun 2026 – Aug 2026 <i>Remote</i>
- Built sales forecasting models using Python and R, analyzing economic and business data to support planning. - Created Power BI reports and worked with NetSuite and Shopify workflows for business intelligence and process automation. - Assisted with customer survey analysis using clustering, UMAP, and data visualization techniques.	
Software Engineer Intern <i>GitLab</i>	Jun 2024 – Aug 2024 <i>Remote</i>
- Improved the Web IDE user experience as a contributor using TypeScript and modern web development practices. - Shipped a commit-message warning feature that validates messages against project push rules before commit, reducing failed pushes. - Refactored existing code and removed unused code/files, improving overall codebase clarity.	
Software Developer, Contract Project — "Getsupporttogether" <i>Code2College</i>	Spring 2026 (1 mo.) <i>Remote</i>
Developed a script to automate data matching between Zoho Forms and Zoho CRM, reducing manual data entry.	
Co-Founder & Lead Developer — "A Light from Above" <i>Independent Roblox game studio (2-person team)</i>	2021 – Present <i>Roblox Studio · Lua</i>
- Co-founded and led a two-person Roblox development studio, architecting and scripting original multiplayer games end-to-end in Lua across combat, horror-simulation, and card-based ability-collection genres. - Directed engineering, marketing, and player-acquisition strategy; managed contracted freelance talent (via Fiverr) for art and audio assets, and analyzed engagement and retention analytics to guide iterative design. - Shipped titles include "Kick Wars," "Totally Awesome Ability Randomizer," "The Pizzeria," "Sleep Walking," and "+1 Speed Slime Keyboard Escape"; open-sourced "InfectAFriend" (github.com/dryhour/InfectAFriend).	
VESL Competitor <i>Varsity Esports & STEM League (VESL)</i>	Sep 2025 – May 2026 <i>North Carolina, Hybrid</i>
Earned 1st place in North Carolina in Game Development, Cybersecurity, and Robotics as part of 2-person competitive teams.	

PERSONAL PROJECTS

Soccer Match Forecaster Python, Machine Learning	In Progress
Building a data pipeline and ML models (Poisson/logistic regression, XGBoost) to forecast soccer match outcomes, scores, and player performance from historical and squad data.	
StudyAI Firebase, JavaScript, HTML/CSS	
Built an assignment-tracking web app where users create, edit, and delete tasks organized on a calendar by priority and due date.	
AP Bio Study Guide JavaScript, HTML/CSS	
Developed an interactive quiz website to help students prepare for the AP Biology exam.	
Personal Portfolio Site JavaScript, CSS, HTML	
Designed and built an interactive portfolio website showcasing projects and technical background.	

LEADERSHIP & COMMUNITY SERVICE

Code2College <i>Volunteer</i>	2024 – 2025 <i>Charlotte, NC</i>
Coached students on technical/behavioral interview strategies and led resume-building workshops (9+ hrs).	

TECHNICAL SKILLS

Languages: Python, R, SQL, JavaScript, TypeScript, Java, Kotlin, C++, HTML/CSS, Lua, Luau, XML
